

LEAF RELIEF[®]

GUTTER PROTECTION THAT REALLY WORKS

by PLY GEM

Leaf Relief® brings real relief to homeowners who need a gutter protection solution that works... the first time, and every time.

Durable, high-quality, innovative, and proven effective, Leaf Relief® boasts a unique design that ends gutter cleaning, lowering home maintenance costs and hassles.

Leaf Relief® pairs extensive technical expertise with today's most advanced technology to offer a patented gutter protection product for existing gutter systems. Our patented Aluma-Perf™ Technology keeps debris out of gutters, allowing water to flow freely. Debris is then lifted away by a normal breeze.*

Because Leaf Relief mounts securely to the existing gutter system, it resists damage from high winds, heavy snow and ice. Constructed from tough aluminum, Leaf Relief® stands up to temperature extremes and resists damage from bugs, squirrels, raccoons, and birds. And the flexible flap offers a perfect, self-sealing fit.

And all Leaf Relief® products are backed by our 10 Year No Clog, No Overflow warranty, so you can choose Leaf Relief® with confidence.

Leaf Relief. Gutter Protection That Really Works.

Series TP

Offering peace of mind with a gutter protection system that installs on existing gutters

Series TP5300

*The efficient alternative to expensive & temporary solutions.
Gutter cleaning days are over!*

* See Leaf Relief Warranty for complete details.

Patented Designs

- Round perforations and a smooth finish prevent debris from sticking to Leaf Relief®'s surface. Plus, the patented Aluma-Perf™ technology keeps leaves and twigs out of gutters which are lifted away with a normal breeze.*
- The long length means fewer overlaps for a cleaner installation.
- Fewer overlaps mean less chance for debris to get in.
- Made of aluminum, Leaf Relief® products keep their shape, regardless of climate conditions.

Extremely durable construction

- Resistant to UV light as well as mold and mildew
- Flexible under extreme weather conditions

Features & Benefits

Home owner benefits

- Maintains house appearance
- Installs without lifting shingles
- Ends gutter cleaning
- Withstands ice and snow falling from the roof

Environmentally friendly design

- Increases the life of the gutter system
- Recovers rain water without debris
- Prevents debris from accumulating in the drain

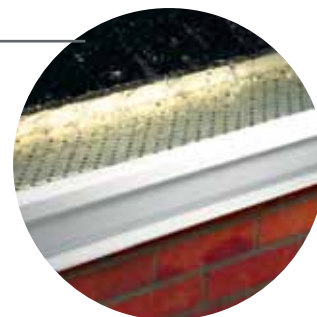

* See Leaf Relief Warranty for complete details.

WATERFLOW

*“How can water enter the gutter?
There are not enough holes and they’re too small.”*

Extensive research and development led to our exclusive Aluma-Perf™ technology. The product has 489 perforations every 20 inches. This drains water at the same rate as a 2x3 downspout. Extensive testing proves that Leaf Relief® products can drain up to 29.7 inches of rainwater per hour; the highest amount of rainfall ever recorded was approximately 12 inches of water in an hour in Holt, Missouri, in 1947.

ICE AND SNOW

“What happens during winter?”

Leaf Relief® products prevent snow from accumulating in gutters, which keeps gutters from losing their shape because of the pressure created on the inner gutter by the weight of the snow.

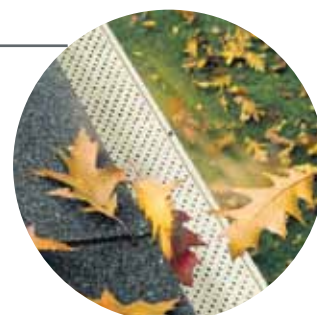

“Will there be ice damming on Leaf Relief®’s surface?”

Never! Water drains directly into the downspout because there are no leaves or debris to stop it. With Aluma-Perf™ technology, Leaf Relief® products improve gutter system efficiency year-round.

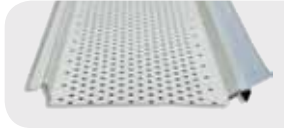

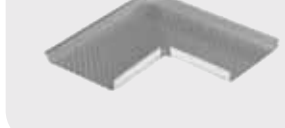

DEBRIS

“Will leaves and small debris stay on the surface?”

The patented design of Leaf Relief® allows water to flow freely while leaves are lifted away from gutters with the help of a normal breeze. See the Leaf Relief “No-Clog, No Overflow” Warranty for complete details.

Leaf Relief® products do not cause ice dams. If icicles form on roof edge, check the attic for proper ventilation and thermal insulation.
